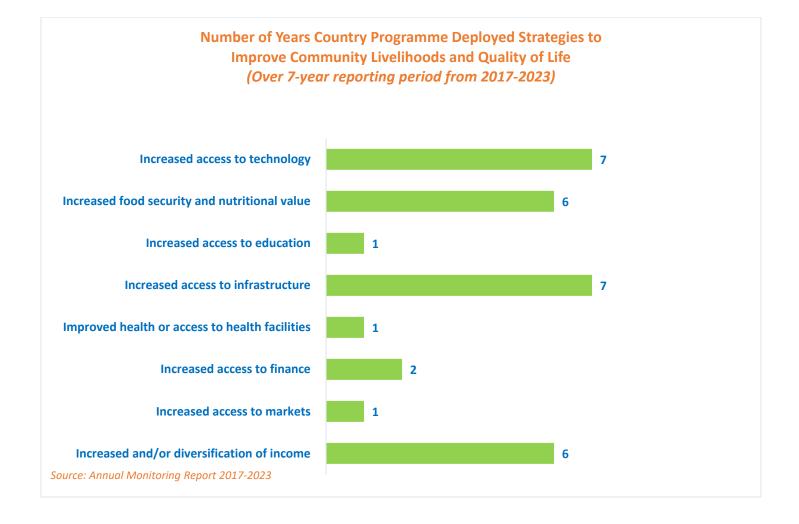

GRAPHICAL REPRESENTATION OF KEY RESULTS

Interpreting the Green Bars in Graphs: The presence of green bars indicates the number of years that the country programme has achieved specific results. If a green bar is absent, it signifies that while the associated result is not observed in the country programme, it is still evident in the overall aggregated SGP portfolio.

Number of Years Country Programme Deployed Gender Mainsreaming Strategies (Over 7-year reporting period from 2017-2023)

Number of Years Country Programme Addressed Sustainable Development Goals (Over 7-year reporting period from 2017-2023)

EVALUATIVE EVIDENCE

UNDP Independent Country Programme Evaluation: Comoros, 2018

• The use of budget resources has been optimized through the search for synergies between country office projects, particularly between RNAP and CRCCA projects that operate in the same sites and often with the same mutually reinforcing structures. This is also the case with the GEF's Small Grants Program, which is involved in building the capacity of associations and other grass-roots organizations in the field of the environment, in addition to the interventions of other UNDP projects and in the same sites.

EXAMPLES OF PROJECT RESULTS

South-South Exchange

In **Comoros**, SGP supported the NGO *Banda Bitsi* to start a partnership with the Tropical Biology Association, which invited NGOs from Madagascar, Mauritius, Seychelles and Maldives to visit the training and integration center of Banda Bitsi for young people and women on green jobs. During the three-day visit, the delegation exchanged knowledge on valorization and recycling of household wastes. Currently, most municipal wastes are simply thrown on the street, in front of houses and shops, especially in the coastal areas of the capital. The wastes are sometimes collected or burned, and often left to rot. There is no municipal landfill, and the waste management is so poor that the entrance to the landfill located about ten km from the capital is often blocked by rubbish or neighboring communities. Aiming at exchanging experience and learning about the sustainable value of waste at the national and regional level, the workshop is expected to identify potential prospects for South-South cooperation in integrated and sustainable waste management in a circular and inclusive economy. *(Source: Annual Monitoring Report, 2018-2019)*

ALIGNMENT OF OP7 COUNTRY PROGRAMME STRATEGY WITH NATIONAL PRIORITIES

As in the case of the OP6 phase, the implementation of OP7 of the PMF/GEF occurs through grassroots action on the political and social levels of the Comoros. It coincides with the adoption of a new constitution which reorients the national and island governance of the Union of the Comoros. A new government and new island institutional frameworks are put in place.

In addition, one of the highlights of government action is the adoption of an Emerging Comoros Plan (PCE) advocating a new vision of development by 2030 which is part of the perspective of the 2030 Agenda of the Nations. United. In this vein, the government has adopted a national policy and a strategy on climate change as well as a national strategy for the supply of drinking water to 100% of the population by 2030. As part of the implementation of the Paris Climate Agreement, the Comoros reaffirmed their desire to provide the country with strategies and programs for risk mitigation and adaptation to the impacts of climate change as well as the strengthening of ecosystem resilience.

The OP7 Strategy is thus aligned with national and international priorities on the environment and sustainable development. It is part of the 2030 SDGs, and the strategic planning documents of the Union of the Comoros, in particular: the Accelerated Growth and Sustainable Development Strategy (SCA2D), and the National Biodiversity Strategy and the Biodiversity Plan. action on climate change. The OP7 Strategy will also contribute to strengthening the network of beneficiaries of PMF projects initiated during previous years with the strategic collaboration of the PMF. The various UNDP projects and programs in the field and the successful experiences in terms of partnerships will promote scaling and facilitate the Grant Maker+ role of the Program at the country level around community solutions for managing the global environment. The strategy is also intended to be in line with the strategic priorities of action of the United Nations System in the Comoros as defined in the UNSDCF (formerly UNDAF).

The country has ratified several international conventions, notably the three Rio Conventions which are: the convention on climate change, the convention on combating desertification and the convention on biological diversity. In 2015, the country signed the Paris Climate Agreement and committed to implementing the SDGs.

The multilateral environmental agreements that the country has ratified are presented in the table below.

List of relevant conventions and national/regional plans or programmes:

| Conventions de Rio + cadres de planification nationale | Date de ratification /achèvement |
|---|--|
| Convention des Nations Unies sur la diversité biologique (CDB) | Date de ratification : 1994 Stratégie nationale et plan d'action sur la diversité biologique 2006, Réactualisée en 2015 |
| Protocole de Nagoya sur l'accès et le partage des avantages (ABS) | Protocole signé en 2012, adopté par les 2 conseils et publié dans le bulletin officiel le 4 juillet 2013. |
| Convention-cadre des Nations Unies sur les changements climatiques (UNFCCC) | Date de ratification 1994 |
| Communications nationales (1er, 2ème, 3ème) - UNFCCC | Elaboration de la première communication nationale sur les CC en 2001 ; Elaboration Programme d'Action National d'Adaptation aux changements climatiques (PANA) en 2006 ; Elaboration de la 2ème communication nationale CC en 2015 |
| Mesures d'Atténuation Appropriées au niveau National UNFCCC (NAMA) | En cours |
| Plans d'action nationaux d'adaptation UNFCCC (NAPA) | Politique, stratégie et plan d'action sur le changement climatique en 2015 PANA élaboré en 2006 |
| Programmes nationaux d'action de l'UNCCD (NAP) | |
| Convention de Stockholm sur les polluants organiques persistants (POPs) | Date de ratification : 2006 |
| Plan national de mise en œuvre de la convention de Stockholm (PNMO) | Les Comores ont élaboré le Plan national de mise en œuvre des POPs avec le financement du FEM 2008. |
| Document de Stratégie de Réduction de la Pauvreté (DSRP) | 2015-2019 |

| Capacité Nationale d'auto-évaluation (CNAE) du FEM | ANCAR : PIF adopté |
|--|--|
| Exercice de formulation du portefeuille national FEM-6 (NPFE) | N/A il n'y a pas eu de NPFE FEM6 ; le gouvernement a affecté les fonds GEF6 à la géothermie |
| Convention de Minamata sur le Mercure | Signature de la convention de Minamata Juin 2014. La ratification est en cours de préparation. Un inventaire des utilisations et des rejets de mercure au niveau national est en cours |
| Protocole de Kyoto à la Convention-Cadre des Nations Unies sur les Changements Climatiques | Adhésion 25 février 2002 |
| Convention sur la protection de la couche d'ozone. | Date de ratification par les Comores 1994 |
| Convention sur le Commerce International des Espèces de Faune et de Flore Sauvages Menacées d'Extinction (CITES) | Date de ratification :1994 ; réactualisation des listes des espèces Comoriennes protégée par la CITES |

| Convention sur les Zones Humides d'Importance Internationale, particulièrement comme Habitats des Oiseaux Aquatiques (Convention Ramsar) | Date de ratification :1994 ; plans d'aménagement et de gestion de sites Ramsar ; lac <i>Boudouni</i> , lac <i>Dzialandze</i> . |
|--|--|
| Protocole de Cartagena | Date de ratification: 2000 |
| Convention régionale pour la protection, la gestion et la mise en valeur du milieu marin et côtier de l'Afrique orientale (Nairobi) | Date de ratification :1985 ; publication d'un atlas sur les ressources côtières ; mise en place d'une base de données SIG ; plan d'action stratégique sur les écosystèmes marins. |
| Convention sur le contrôle des mouvements transfrontières de déchets dangereux et de leur élimination (Bale) | Date de ratification :1994 Inventaire sur les Déchets Dangereux (DD) en juin 2004 |
| Convention des Nations Unies sur la lutte contre la désertification | Date de ratification :1998 ; étude et diagnostic des phénomènes pouvant induire la sécheresse. |

UNDP-implemented Small Grants Programme is delivering integrated results at the country level supporting local level capacities aligned with multiple Multilateral Environmental Conventions. This includes support to work for CBD National Biodiversity Strategy and Action Plan (NBSAP), UNFCCC Nationally Determined Contributions (NDCs), Nationally Appropriate Mitigation Actions (NAMA) and National Adaptation Plans of Action (NAPA), UNCCD National Action Programmes (NAP), and localization of Sustainable Development Goals, amongst many others.

METHODOLOGICAL BASIS OF COUNTRY REPORT

- Results aggregations over time are only for completed projects.
- With SGP's rolling modality, results reflect all ongoing operational phases during the indicated period. Please refer to the total projects completed on the first page for information in this regard.
- The source of reported results is the annual monitoring process, which is part of the annual monitoring requirements for each country programme.

 Additionally, evaluative evidence sources have also been leveraged, if available for the country programme.
- This results report benefits from extensive quality assurance. All information across all countries in the portfolio is harmonized, verified, and evidenced before being reported. Several layers of this quality assurance have been implemented in the generation of this report and there are no result duplications across years. This point is important not only for a specific unit of measurement (i.e., indicator selected) but also for results aggregation across years in a given operational phase. Reported results include both direct and indirect global-environmental and socio-economic benefits. This is due to SGP's work in two key areas:
 - SGP works towards behavioural change at individual, organizational, and community levels. Social determinants that shape human interaction with the environment play an important role, especially at the community level, as sustainability and the continuation of environmental gains often depend on them. These factors include positive shifts in knowledge, attitudes, practices, social and cultural norms, and conventions. Such interventions shape not only demand but also communication between community leaders and other influencers in promoting the adoption of environmentally friendly behaviours and practices. Often, SGP projects have ripple effects that go well beyond the direct scope of the project, emphasizing the importance of measuring indirect impact.
 - o Encouraging Community Action for Environmental Change. For many years, SGP has focused on promoting and supporting local community groups to bring about broader and sustainable environmental change. This approach is a key aspect of SGP's work and recognizes the power of motivated community groups to create significant impact and drive positive transformation. Community group action refers to informal gatherings of individuals and organizations in the community who share a common belief and purpose. It involves taking practical steps over time to address environmental and socioeconomic challenges and creating positive change. This grassroots-level approach relies on the active involvement and empowerment of the community, with the initial efforts acting as a catalyst for further mobilization. By encouraging self-governance and involving those most affected by the issues, community action can extend its influence to more people in the community, underscoring the importance of measuring indirect impact.
